PROFESSIONAL SUMMARY

Frontend Engineer with hands-on experience building scalable sportsbook and casino web applications using React.js, Next.js, and Tailwind CSS. Skilled in real-time data handling with WebSocket, state management with Redux Toolkit, Redux Saga, and Redux Thunk, and frontend performance optimization. Experienced working with backend, QA, and product teams in Agile environments to ship production-ready features.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3
Frameworks and Libraries: React.js, Next.js, Tailwind CSS, Highcharts
State Management: Redux Toolkit, Redux Saga, Redux Thunk
APIs and Real-Time: REST APIs, WebSocket, API Integration, Payment Gateway Integration
Tools: Git, GitHub, Docker, Postman, Figma
Practices: Agile/Scrum, Component-Driven Architecture, Responsive Web Design, Performance Optimization, Code Splitting and Lazy Loading, Memoization, Role-Based Access Control

PROFESSIONAL EXPERIENCE

Solution Engineer (Frontend) | GammaStack | Indore, India | March 2025 – Present

- Built scalable frontend modules in React.js for sportsbook and casino platforms serving high-concurrency user bases.
- Developed real-time data pipelines with Redux Saga and WebSocket, delivering live odds updates and instant bet-placement feedback with minimal latency.
- Improved page load performance and reduced rendering bottlenecks using memoization, lazy loading, and optimized state management.
- Implemented end-to-end betting workflows, including bet slip management, event listings, and result settlement interfaces, in collaboration with backend and QA teams.
- Integrated third-party services and payment gateways through REST APIs, with clean API contracts and robust error handling.
- Built admin panel features and internal dashboards that streamlined operations and deployment workflows across teams.
- Diagnosed and fixed production bugs and contributed to sprint planning and reviews to keep releases on schedule.

PROJECTS

Betwgb – Sportsbook, Virtuals and Casino Platform (Nigeria) | React.js, Redux Saga, WebSocket, Tailwind CSS | betwgb.com

- Developed frontend features for a live betting platform offering football odds, virtual games, and casino titles for the Nigerian market.
- Implemented real-time odds updates and bet slip interactions using WebSocket and Redux Saga.
- Built responsive, mobile-first interfaces for betting, deposit flows, and game lobbies.

Betski – Sportsbook and Casino Platform | React.js, Redux Saga, WebSocket, Tailwind CSS | betski.com

- Delivered core sportsbook and casino features, including live odds, betting workflow management, and event-driven UI interactions.
- Optimized WebSocket event handling to support high-frequency data updates, improving responsiveness and user engagement.

Arc and Gamma Sweep – Internal Product Suite | React.js, Redux Toolkit, REST APIs

- Built scalable admin modules and management dashboards for internal operations.
- Created a reusable UI component library and optimized state management for complex data flows.
- Implemented secure role-based authentication and standardized component patterns to speed up team delivery.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Medi-Caps University, Indore, India | Aug 2021 – Aug 2025 | CGPA: 7.0
